

ABSTRACT

This invention provides a compound of the formula (I):

(I)

5 or the pharmaceutically acceptable salts thereof wherein X^1 and X^2 are halo; R^1 and R^2 are independently hydrogen or C_{1-4} alkyl; R^3 and R^4 are each hydrogen or halo; and

R^5 is

- (a) $-C_{3-9}$ diazacycloalkyl optionally substituted with C_{5-11} azabicycloalkyl;
- (b) $-C_{3-9}$ azacycloalkyl- $NH-(C_{5-11}$ azabicycloalkyl optionally substituted
10 with C_{1-4} alkyl);
- (c) $-NH-C_{1-3}$ alkyl- $C(O)-C_{5-11}$ diazabicycloalkyl;
- (d) $-NH-C_{1-3}$ alkyl- $C(O)-NH-C_{5-11}$ azabicycloalkyl, the C_{5-11} azabicycloalkyl being optionally substituted with C_{1-4} alkyl;
- (e) $-C_{3-9}$ azacycloalkyl optionally substituted with C_{3-9} azacycloalkyl; or
- (f) $-NH-C_{1-5}$ alkyl- $NH-C(O)-C_{4-9}$ cycloalkyl- NH_2 .

15 These compounds are useful for the treatment of medical conditions mediated by bradykinin such as inflammation, allergic rhinitis, pain, etc. This invention also provides a pharmaceutical composition comprising the above compound.
